Web Application Part/Final
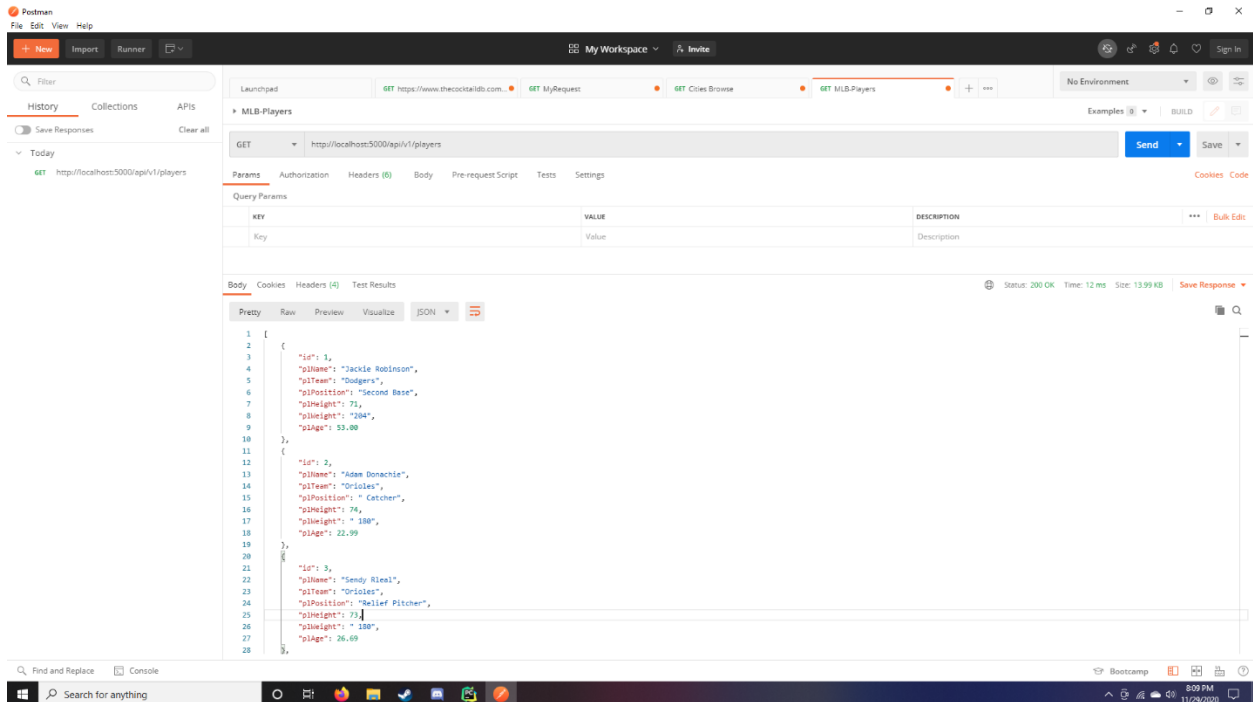

Repository Link:

https://github.com/mjdroz/WebAppHW/tree/newData-part4

With written permission from TA Kaustav Bhattacharjee I did the homework on a separate
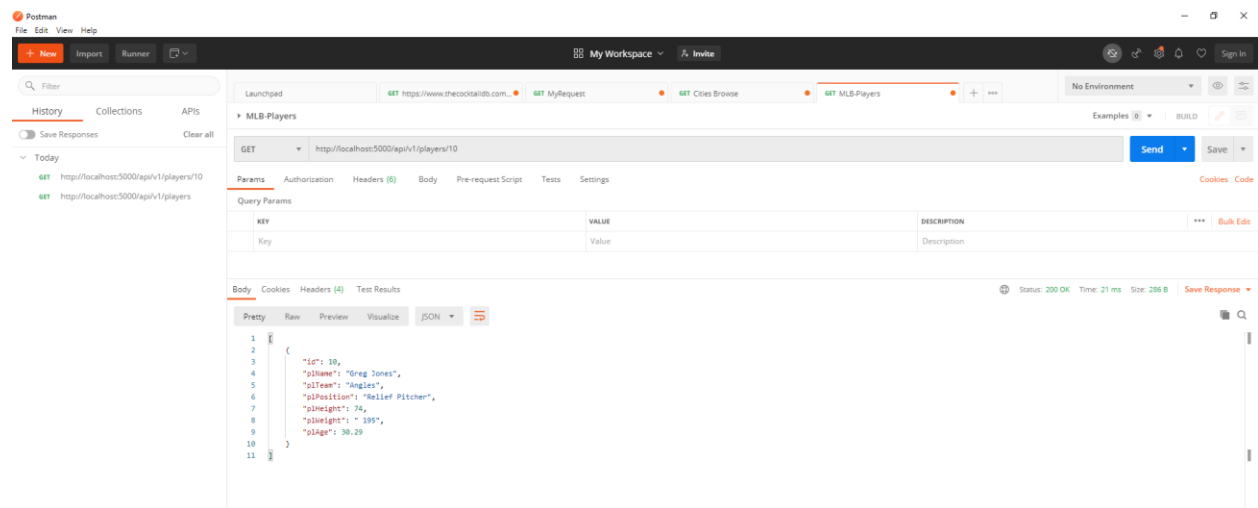

branch of the other parts of the web application homework.

Part A:
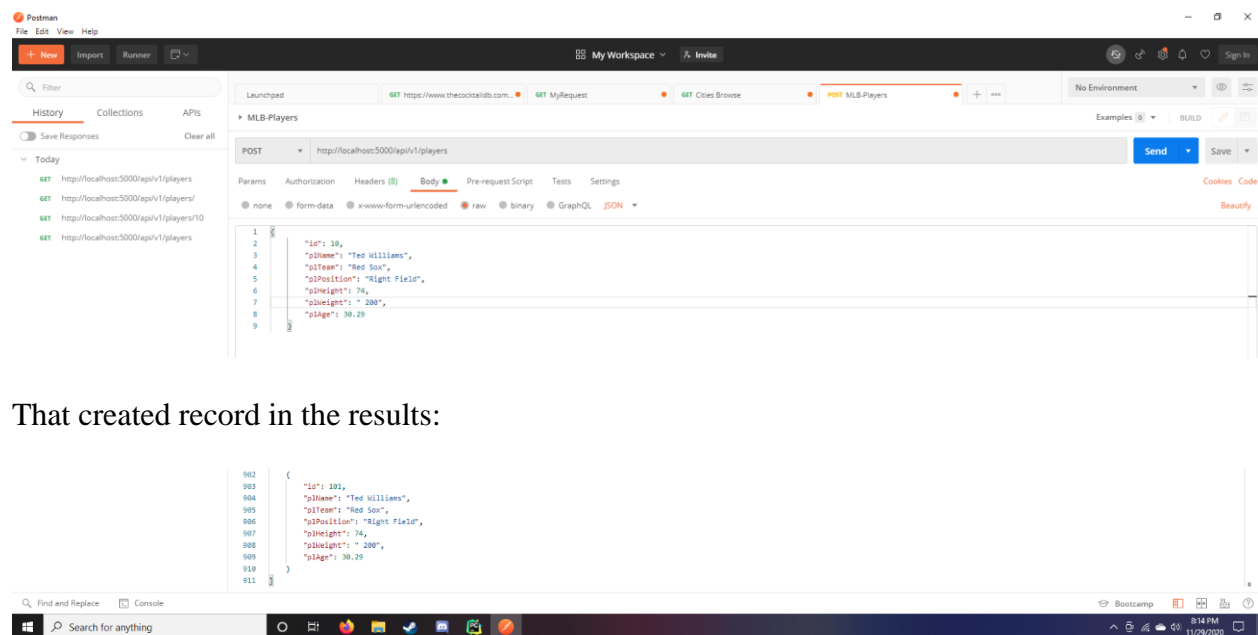

Postman listing all records (get request):

Part B:
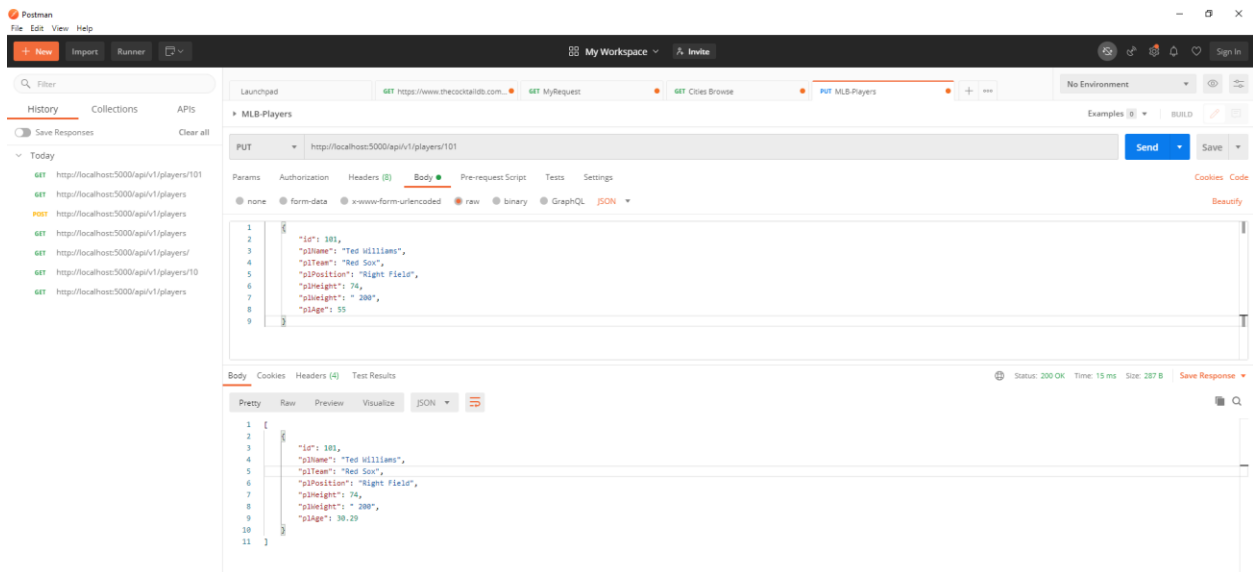

Postman showing only one record with a get request:

Part C:

Postman creating a record (post request) (The record created has ID 101):

That created record in the results:

Part D:

Editing a record in Postman (put request) (I changed the players age from 30.29 to 55):

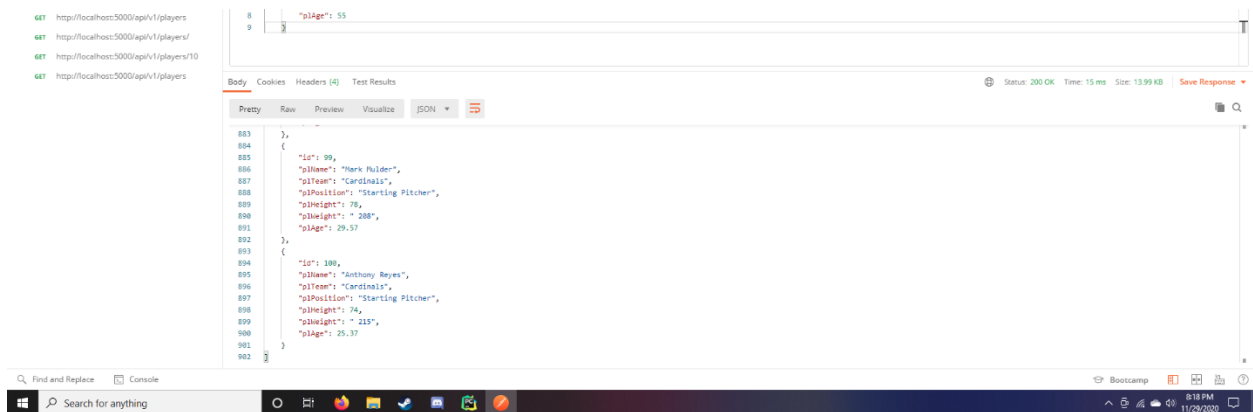

The results after the put request:

Part E:

Postman deleting a record (delete request) (I removed the player with ID 101):

Results after the delete request:

Empty Listing for ID 101:
